Most Memorable Moment:

2005 World Championship Final; because no one has ever expected it, including myself. Being an underdog, and also the fact that I am kind of semi-retiree in badminton, winning the World Championship was a very fulfilling personal achievement. I would never dream of playing against my former partner, Candra Wijaya. By the way, rumor said that the betting odd for us winning was 1:20.

2000 Olympics Final; because Olympic happens only once every four years, the gold medal is every athlete's dream, and it is so damn hard to get. Besides, Candra and I were the number one seed and our country's hope for the gold medal. The pressure was so enormous and the amount of work I put was not a matter of days; it was more like months of discipline, determination, hard work, hard work, and more hard work.

1996 Indonesia Open; because it was a turning point for my career as I defeated the Unbeatable Duo – Ricky and Rexy in the quarter final (partner with Rudy Wijaya). Late 1994 to

1996 was Ricky/Rexy's golden era; they were on the winning streak for one and half years. Defeating them boosted up my confidence and made me realize that I had reached the level of top doubles players.

Playing badminton competitively for over 15 years requires me to maintain my level of fitness throughout the years.

Since I got introduced to LifeWave by Roy Surjono, I have been using Energy Enhancer religiously. I can't even go to practice or Tournaments without that patch. These patches really increase my stamina, my focus and my strength greatly. I use Energy Enhancer, Glutathione and Carnosine for helping me throughout my career as a Badminton Player. There are so many close games that I normally would run out of energy before the patches, but now I am able to pull it off easily and win tournaments.

Thanks to the patches.

I am almost 34 years old and most badminton players are retiring at 25 years old. I am currently ranked #6 in the world and since the patch I am winning more tournaments even at my age. The average age of competitors in the top ten spots is about 22 years old. From this age separation alone we can see that the patches are really helping me.

Thank you so much to Roy Surjono for teaching me the triangle of upper and lower dantien super power, so that I am always fit and ready for every tournament. I never run out of energy anymore.

Success to you always:

Tony Gunawan
