## **GENERAL ARTICLE**

### **Introduction**

**The following document is a full version of the research project undertaken during April-May 2009 in India at the Centre for bio field sciences, World Peace Centre, MIT College, Pune.**

### **STUDY OBJECTIVE:**

**To determine the efficacy of the LifeWave patches (Ice wave and Glutathione Patches).**

## **TIME PERIOD OF THE STUDY:**

**April-May 2009.**

## **PRIMARY DATA COLLECTION:**

**Centre for Biofieldsciences.**

## **AIM**

**The aim of this research project is to examine the changes in energy fields and chakras so as to prove the efficacy of LifeWave patches (Ice Wave and Glutathione Patches).**

**The following five established devices were chosen to be used for the comparison between before and after scans:**

- 1. POLYCONTRAST INTERFERENCE PHOTOGRAPHY (PIP)**
- 2. GAS DISCHARGE VISUALISATION (GDV)**
- 3. Electro Interstitial Scan (EIS)**
- 4. Electro Sound level Meter (ESM)**
- 5. Chakra Temperature**

**The doctors and researchers working on the project were monitoring all the tests and ensured that the tests, on all the five devices, were carried out perfectly according to the protocol and standard norms & conditions.**

### **ABOUT LIFE WAVE (ICEWAVE AND GLUTATHIONE):**

**It's been known for thousands of years that specific frequencies of light can cause specific changes within the human body. When we go out in the sun, a frequency of light causes our body to make Vitamin D. Another frequency of light (UV) will cause our body to make melanin, the chemical that gives us a sun tan.**

**LifeWave patches use this knowledge to stimulate acupuncture points on the body for improving the flow of energy without the use of needles and producing drug-free pain relief through the IceWave patches and increased Glutathione levels with the use of the Glutathione patches, within minutes of use.**

**We can produce an objective assessment through PIP, GDV, EIS, ESM and Chakra Temperature scanning techniques.**

### **METHODOLOGY:**

**25 subjects were scanned, who were suffering from any pain for the period of approximately 6 months. Participants were selected randomly through local newspaper advertisements and university notices.**

**Each participant was booked in for two appointments each lasting around 1 hour. They filled their consultation, consent form and then underwent the first round of five scans.**

**All these participants were then rescanned with the same five devices, again in a random order on second visit.**

**Visit 1: The before scans were recorded as follows (BASELINE):**

- **PIP (Polycontrast Interference Photography)**
- **GDV (Gas discharge visualization)**
- **Electro Interstitial Scan (EIS)**
- **Electro Sound level Meter (ESM)**
- **Chakra Temperature**

**After the scans the Patches was applied for a 24 hour period.**

**Visit 2: PIP, GDV, EIS, ESM, Chakra Temperature repeat/after scans were done.**

## **TOTAL ENROLLMENT:**

|                              |                       |
|------------------------------|-----------------------|
| <b>Total No. of subjects</b> | <b>25</b>             |
| <b>Control</b>               | <b>5</b>              |
| <b>Experimental</b>          | <b>10 IceWave</b>     |
|                              | <b>10 Glutathione</b> |
| <b>Age</b>                   | <b>21-70 yrs</b>      |
| <b>Sex</b>                   | <b>male or female</b> |

Scans were carried out and analyzed by leading experts in the specific imaging technology. Most of the results were qualitative and cross comparison was complex. Overall there were significant positive changes in all 5 assessment techniques. (See Appendix for case specific examples).

The participants were then randomly rescanned with the same five devices.

## **RESULTS**

Scans were obtained of 25 participants. Each case was individually examined and analyzed.

The results obtained support the effectiveness of the Life Wave Patches.

- PIP scans showed positive change in 18 participants out of 20.
- Two (2) of these 20 scans showed no changes.
- The GDV, EIS, ESM and Chakra temperature scans show results in correlation with PIP.

| <b>Control</b> | <b>Positive Change</b> | <b>Negative Change</b> | <b>No Change</b> |
|----------------|------------------------|------------------------|------------------|
| <b>5</b>       | <b>18</b>              | <b>0</b>               | <b>2</b>         |

## **CONCLUSIONS**

**It seems clear that the LifeWave- ICEWAVE Patches (have a profound effect on pain management and LifeWave –Glutathione patches have a profound effect in detoxification.**

**In addition to the analysis part of the data, during experiments changes witnessed in the biofield were strongly positive in the after scans. From this research we can conclude that the LifeWave Patches (ICEWAVE AND GLUTATHIONE) are a very effective means of neutralizing pain and in detoxification as well.**

- Maximum changes were seen in the solar plexus and lower back along with significant positive change in the biofield.**
- Predominance of harmonious green and pink frequencies increase with prolonged use of the Life Wave Patches (ICEWAVE AND GLUTATHIONE).**
- Blocked chakras, especially solar plexus, are seen to open up. Red congested energy is replaced by green or violet healing energy.**
- Positive effects are also seen over lung fields in some of the cases.**
- Muscle spasm were reduced after applying IceWave patch.**
